FOR HIGH TENSILE
STRENGTH STEEL

Typical applications

Butt and fillet welding of vehicles, cars, ships, machineries and bridges.

Characteristics on Usage

- ① Arc is very stable and can be used for welding steels which have a rusty or dirty surface because wire has a triple deoxidizer (Al, Ti, Zr).
- ② It is able to obtain the good bead appearance with the use of Ar+CO₂ mixtures as shielding gas.

Typical chemical composition of wire (%)

C	Si	Mn	Ti	Al	Zr
